# FLUID POWER

PRODUCT  
OVERVIEW

An industry leader in the design and manufacturing of highly engineered heat transfer products sold through a global network of distribution partners.

We COOL  
what you  
POWER

## We are an API Heat Transfer Company.

Sold through a global network of distribution partners, TTP offers a complete portfolio of standard products available from API Heat Transfer. This includes a broad range of fluid power related heat exchangers (oil-water, oil-air, air-air) utilized in mobile and industrial applications, along with custom engine cooling models.

## We are a global network of distribution partners.

As a recognized industry leader, TTP catalogs a wide offering of standard oil coolers and builds custom designed OEM Engine coolers and modules for Industrial Fluid Power and Mobile markets. We design and build heat exchangers from Aluminum and Copper materials—both components and multi-tiered cooling modules. We have extensive experience engineering to applications in the Mobile, Industrial, Compressor and Process industries.

TTP Headquarters – Racine, WI USA

ISO  
9001:2008  
REGISTERED

## We serve these markets.

Industrial Machinery  
Agriculture  
Material Handling  
Fluid Power  
Construction

Oil & Gas  
Specialty Equipment  
Turf Care

## We are a world of heat transfer solutions.

- Racine, Wisconsin
- Franklin, Wisconsin
- Iron Ridge, Wisconsin
- Buffalo, New York
- Arcade, New York
- Bretten, Germany
- Dortmund, Germany
- Suzhou, China

# Mobile Cooling

Our Mobile solutions offer oil coolers, radiators, and charge air coolers with or without electric DC fans and Hydraulic fan motor drives. Built from brazed aluminum or copper round tube and fin, and are available in standard catalog product and custom designed OE modules.

## Market Focus

- Agriculture
- Construction
- Forestry
- Material Handling
- Mining
- Off-Highway
- On-Highway
- Specialty
- Turf Care

Turn-key Cooling Module

## Our Product Series

## New Technology

### Brushless DC Fan

TTP now offers axial fans equipped with Brushless DC electric motors. These fans are a featured option on many P-BAR Series MA standard catalog oil coolers. Brushless motors offer benefits for extended life including low current draw on start up, custom fan speed control and lower ambient noise.

# Industrial Cooling

Our Industrial solutions offer air cooled oil coolers built with our without electric AC motors and water cooled shell & tube coolers designed for multiple fluid types and built from aluminum, copper and steel for fluid power related applications.

## Market Focus

Hydraulic Presses  
 Injection Molding and Extrusion  
 Hydraulic Power Units  
 Oil & Gas  
 Wind Energy  
 Paper Industry

## Wide Range of Technology

**Cool Loop COLW Series** Water cooled Cool Loop offline fluid conditioning system. Utilizes a high efficiency EK Series shell & tube heat exchanger.

**Bypass Valves** TTP now offers two bypass valve options on standard BOLR and MAR models—a factory installed integrated pressure valve and a temperature/pressure bypass valve.

**BP Series** Our BP Series heat exchangers are rugged, compact, cost-effective and reliable over long periods of time with minimal maintenance.

**PF Series** Our PF Series heat exchangers are a compact, serviceable design and flexible cost saving alternative.

**HC Series** TTP introduces the HC-Series shell & tube heat exchangers. “Hybrid” design based on interchangeability with the previous TTP C-Series.

# Compressor Cooling

TTP manufactures air to air aftercoolers, water to air aftercoolers, and air to oil lube oil coolers for air compressor applications in both catalog and custom OE models. Our high quality products provide outstanding cooling performance in rotary screw, piston and centrifugal air compressors, as well as vacuum systems and blower lube oil coolers.

## Market Focus

- Oil & Gas
- Power
- Pharmaceutical
- Waste Water
- Printing
- Auto
- Plastics
- Paper
- Metals
- Transit

# Process Cooling

TTP process coolers cover a wide variety of industrial process applications, across many industries. These coolers are used in the daily plant operations to provide a means of highly reliable, compact and efficient cooling. Our process coolers cover a variety of industrial applications beyond Hydraulics Oil Cooling—chillers, fuel heaters, biogas, natural gas, de-ionized water, refrigerant air cooling, condenser and more.

## Market Focus

Chemical Processes	Hydraulic Power Units
Mining	Food Industry
Pulp & Paper	Oil & Gas
Marine	Plastic Injection Molding
Power Generation	Extrusion Machinery

## Our Product Series

EKT	HCR	CA	EC
PF	PVR	HC	EK
USSC/USSCV (stainless steel)			

## Wide Range of Technology

### Brazed Plate Heat Exchangers

**BP Series** heat exchangers are rugged, compact, cost-effective and reliable over long periods of time with minimal maintenance. The compact design and multiple mounting options lead to optimization of heat transfer for compact industrial applications. 316 stainless steel construction and standard SAE connections are features of this highly efficient technology.

### Plate & Frame Heat Exchangers

**PF Series** heat exchangers are a compact, serviceable design and flexible cost saving alternative. The unique designs produce high heat transfer coefficients for a given application. Large heat exchanging surfaces in a very compact, space-saving frame. Double sealing design prevents the possibility of mixing the two process fluids. Readily expanded for greater capacities. Low temperature approaches/differences. Capable of handling large volumetric flows with low pressure drops.

### Available Contraction Materials

- Carbon Steel
- Stainless Steel
- Duplex & Super Duplex Stainless
- Copper & Copper Alloys
- Nickel & Nickel Alloys
- Hastelloy
- Chrome-Moly Alloys
- Titanium
- Alloy-Lined, Clad, Explosion-Clad & Weld Overlay

### Available Certifications & Registrations

- TEMA
- ASME
- C-TPAT
- ISO 9001
- API
- ABS
- GOST-R
- NR-13
- PED
- HTRI

# Engine Cooling

## Flexible Cooling Solutions for Diesel, Gas, Alternative Fuels & E-Fan Integration

TTP can supply complete cooling packages, including in-house designed framing, fan shroud, finger guard, expansion tank, and more. Modules are pressure and leak tested, assembled and packaged.

### TUBULAR MICRO CHANNEL EXTRUSION

### CUSTOM PLATE & BAR DESIGN

### SEAM WELDED TUBE

**T-BAR** is a proprietary extrusion design and one of the most clever cooling technologies available on the market today. Highly engineered on the front end, equals simplicity on the application end. T-BAR has unrivaled strength and rigidity, which ensures reliable field performance. T-BAR is factory zinc coated for cathodic protection, seam/leak free extruded and ultimately reliable.

#### Superior Performance

Aluminum has up to 25% higher heat transfer capacity in comparison to a traditional copper/brass cooling package.

Look to T-BAR for demanding applications where performance is an absolute.

**P-BAR** is the most efficient design solution in heat transfer today, utilizing an aggressive hot side turbulator. Perfect for all fluid medias in diesel engine cooling applications demands, while offering remarkable heat rejection levels for new Tier systems. P-BAR is a cost effective solution and excels in core combination packaging.

#### Superior Performance

Aluminum has up to 30% higher heat transfer capacity in comparison to a traditional copper/brass cooling package.

Look to P-BAR as an industry standard solution & available globally.

**S-BAR** is a high strength automotive design, utilizing a seam welded, free flowing tube design. Constructed in a tube to header plate fashion, with options for multiple rows, fin types and tank material (plastic or metal). S-BAR is the choice for engine water jacket cooling in lower HP ranges and OEM production volumes. Engineered for challenging heat loads and demanding ambient conditions.

#### Superior Performance

S-BAR high flow tubes offer higher heat transfer capacity in comparison to traditional radiator cooling package designs.

Look to S-BAR for high volume OE applications in small HP ranges.

# NEW Products

## BP Series

Our BP Series heat exchangers are rugged, compact, cost-effective and reliable over long periods of time with minimal maintenance. The compact design and multiple mounting options lead to optimization of heat transfer for compact industrial applications. 316 stainless steel construction and standard SAE connections are features of this highly efficient technology.

## Plate & Frame Heat Exchangers

PF Series heat exchangers are a compact, serviceable design and flexible cost saving alternative. The unique designs produce high heat transfer coefficients for a given application. Large heat exchanging surfaces in a very compact, space-saving frame. Double sealing design prevents the possibility of mixing the two process fluids. Readily expanded for greater capacities. Capable of handling large volumetric flows with low pressure drops.

## HC Series

TTP introduces the HC-Series shell & tube heat exchangers. "Hybrid" design based on interchangeability with previous TTP C-Series units. The HC Series remains the industry standard in ultimate value and long-term reliability. This proven fixed tubesheet design shell and tube heat exchanger offers the cost effectiveness that comes with having a highly standard design, while easily providing for various options to meet specific application requirements.

## Brushless DC Fan

TTP now offers axial fans equipped with Brushless DC electric motors. These fans are a featured option on many P-BAR Series MA standard catalog oil coolers. Brushless motors offer benefits for extended life including low current draw on start up, custom fan speed control and lower ambient noise.

## Bypass Valves for BOLR and MAR Series

TTP now offers two bypass valve options on standard BOLR and MAR models—a factory installed integrated pressure bypass and a thermo/pressure bypass.

# XSELECTOR

## The XSELECTOR Software program from TTP allows you to:

- Perform cooler heat transfer sizing and analysis on coolers for Air Cooled and Water Cooled applications.
- Now perform cooler heat transfer sizing and analysis on Air Cooled (Air Blast) coolers found in our P-BAR Series and Braze Plate in our BP Series
- Size our Proprietary T-BAR core (OCA only)

The Aftercoolers and COL units are not included in the software

\* To register for XSelector please go to [www.thermaltransfer.com/get-in-touch/](http://www.thermaltransfer.com/get-in-touch/) and complete the XSelector Inquiry form and submit.

Download the XSelector for both Apple and Android formats by searching for XSelector in their App Stores. You must first register for XSelector before using it on mobile devices.

### Available fluids that can be selected include:

- ISO Grade Oils from ISO 32 to ISO 220
- Water
- Various Water/Glycol Mixes

Projected results allow the user to select the cooling solution from a list of performing heat exchangers.

Final model selection choice can be decided from the following sizing results:

- Performance
- Material
- Weight
- Size
- Price Factor
- Estimated Delivery

## 3D Standard Product Configurator

### Configure your AO Series

Dimension	Value	Unit
A	13.34	Inch
B	20.00	Inch
C	11.81	Inch
D	22.82	Inch
E	19.25	Inch
F	20.89	Inch
G	20.19	Inch
H	12.40	Inch
J	24.21	Inch
M	9.82	Inch
L	19.25	Inch
M Thread	1 3/4" BSPP	Inch
N	11.73	Inch
P	23.85	Inch
T	-	Inch

### Features:

#### PDF Datasheet

- Displays 3D Model that can be Rotated to Desired Position
- Provides Basic Series Data
- 2D Drawing of Configured Unit

#### CAD Download

- 150 Software Packages of Native CAD Programs

#### Video

# Tech Center

Our Tech Center capabilities include:

## Performance Validation and Enhancement

- Performance testing of new or existing designs with service fluids including Water and Glycol
- Bench test comparison testing between API Heat Transfer designs and designs by other manufacturers
- Test facilities for Pasteurization, Evaporation and Dealcoholization running with original customer's products

## Buffalo Lab

- Calorimetric Performance Testing
- Pressure and Thermal Cycle Testing
- Computational Fluid Dynamics (CFD)
- Thermal Contact Resistances Measurement

## Bretten Lab

- Single phase flow stands for thermal performance and pressure drop testing
- Pilot plants
- Utilities

**Our fully equipped multiple-disciplinary Technical Centers in Buffalo, NY and Bretten, Germany are available for expert application engineering, metallurgical and analytical support. Working with our customers and OEMs, we provide heat exchanger performance modeling, performance analysis and mechanical testing.**

- Integrated heat transfer performance test platform.
- Sophisticated laboratory analytical services providing metallurgical, chemical and polymer analysis using EDS x-ray, FTIR and DSC, as well as a wide array of mechanical and material properties analysis.
- Durability, life cycle and corrosion testing platforms to validate designs and optimize materials and performance.
- Providing the technology and expertise to support the development of new products to meet the current and future needs of our customers.

# See how our performance can improve yours.

With manufacturing facilities, R&D locations and sales support all over the world, we're where you need us to be. Contact your TTP sales rep or visit [thermaltransfer.com](http://thermaltransfer.com).
